Application No. 09/745,607  
Amendment "A"

Amendments To The Claims

Claim 1 (currently amended): A method for controlling the transmission of control information to an input device in an entertainment system, comprising:  
receiving programming data associated with a broadcast channel displaying a show associated with the channel;  
configuring an input device to operate in a first mode that suspends transmission of all channel selection input control information entered via said input device, to the entertainment system.

Claim 2 (original): The method of claim 1, further comprising displaying a message indicating that said input device is configured to operate in the first mode.

Claim 3 (original): The method of claim 2, wherein said message is displayed for a predetermined period of time.

Claim 4 (currently amended): The method of claim 1, wherein configuring the input device comprises:

~~selecting a key on said input device;~~  
~~prompting the user to enter a password;~~  
displaying a menu having at least one option that facilitates configuration of said input device to operate in said first mode that suspends transmission of input control information to the entertainment system;  
selecting said at least one option[[.]];  
selecting a key on said input device following the selection of the at least one option; and  
prompting the user to enter a password.

Application No. 09/745,607  
Amendment "A"

Claim 5 (original): The method of claim 4, further comprising displaying a status key indicating that said first mode is selected.

Claim 6 (original): The method of claim 1, further comprising receiving an instruction to configure the input device to operate in a second mode that facilitates unlimited transmission of input control information to the entertainment system.

*M/C*  
Claim 7 (currently amended): The method of claim 6, wherein receiving said instruction to configure the input device to operate in the second mode comprises:

selecting said key on said input device;

prompting the user to enter the password;

confirming the validity of said password;

displaying a menu having an option that facilitates configuration of said input device to operate in said second mode that facilitates unlimited transmission of input control information to the entertainment system;

selecting said option that facilitates configuration of said input device to operate in said second mode[.]);

selecting said key on said input device following the selecting of said option;

prompting the user to enter the password; and

confirming the validity of said password.

Claim 8 (original): The method of claim 7, further comprising displaying a message indicating that said input device is configured to operate in the second mode.

Claim 9 (original): The method of claim 1, further comprising terminating transmission of all input control information to said entertainment system entered via said input device.

Application No. 09/745,607  
Amendment "A"

Claim 10 (original): The method of claim 9, further comprising reactivating transmission of all input control information to said entertainment system entered via said input device upon selection of a dedicated key on said input device.

*Att Cont*

Claim 11 (currently amended): An entertainment system comprising:  
a display monitor; and  
a broadcast receiver coupled to the display monitor, the broadcast receiver including

a front-end unit capable of receiving programming data associated with a show broadcast for viewing on the display monitor,  
a memory, and

a central processing unit coupled to the memory, the central processing unit coupled to receive programming data associated with a broadcast channel, the central processing unit to execute software to display a show associated with the channel, said central processing unit to execute software to configure an input device to operate in a first mode that suspends transmission of all channel selection input control information entered via said input device, to the entertainment system.

Claim 12 (original): The entertainment system of claim 11, wherein the central processing unit further executes software to display a message indicating that said input device is configured to operate in the first mode.

Claim 13 (original): The entertainment system of claim 12, wherein said message is displayed for a predetermined period of time.

Claim 14 (currently amended): The entertainment system of claim 11, wherein configuring the input device comprises:  
Selecting a key on said input device;

Application No. 09/745,607  
Amendment "A"

prompting the user to enter a password;

displaying a menu having at least one option that facilitates configuration of said input device to operate in said first mode that suspends transmission of input control information to the entertainment system;

selecting said at least one option[.];

selecting a key on said input device following the selection of the at least one option; and

prompting the user to enter a password.

Claim 15 (original): The entertainment system of claim 14, wherein said central processing unit further executes software to display a status key indicating that said first mode is selected.

Claim 16 (original): The entertainment system of claim 11, wherein said central processing unit further receives an instruction to configure the input device to operate in a second mode that facilitates unlimited transmission of input control information to the entertainment system.

Claim 17 (currently amended): The entertainment system of claim 16, wherein receiving said instruction to configure the input device to operate in the second mode comprises:

selecting said key on said input device;

prompting the user to enter the password;

confirming the validity of said password;

displaying a menu having an option that facilitates configuration of said input device to operate in said second mode that facilitates unlimited transmission of input control information to the entertainment system;

Application. No. 09/745,607  
Amendment "A"

selecting said option that facilitates configuration of said input device to operate in said second mode[[-]]; 

selecting said key on said input device following the displaying of the menu and the selecting of said option;

prompting the user to enter the password;  
confirming the validity of said password.

Claim 18 (original): The entertainment system of claim 17, wherein said central processing unit further displays a message indicating that said input device is configured to operate in the second mode.

Claim 19 (original): The entertainment system of claim 11, wherein transmission of all input control information to said entertainment system entered via said input device is terminated.

Claim 20 (original): The entertainment system of claim 19, wherein transmission of all input control information to said entertainment system entered via said input device is reactivated, upon selection of a dedicated key on said input device.
